

PROFESSIONAL SUMMARY

Senior PHP and full-stack developer with 15+ years of experience delivering web applications, database-backed systems, API integrations and client projects. Strong background in PHP, MySQL, JavaScript/Ajax, WordPress, CodeIgniter and REST APIs, with experience translating requirements into practical designs and managing projects through delivery. Recent hands-on work also includes Python automation, AI-assisted software development, API-driven workflows and automated digital publishing systems.

CORE TECHNICAL SKILLS

Backend	PHP, MySQL, REST APIs, web services, backend application development
Frontend	HTML, CSS, JavaScript, Ajax, ReactJS
CMS / Frameworks	WordPress, CodeIgniter, Magento, Drupal, osCommerce
Integrations	Salesforce, payment gateways, Google Maps, PayPal, third-party APIs
Automation / AI	Python automation, AI-assisted development, API workflows, content/document generation
Engineering	Requirements analysis, database design, debugging, validation, security, delivery management

PROFESSIONAL EXPERIENCE

Senior PHP Developer

RexDirect | USA | 2009-2024

- Integrated Salesforce, payment gateway, Google Maps and other APIs into web applications.
- Developed backend components connecting applications with external web services.
- Gathered and translated client requirements into project designs and implementation plans.
- Managed development milestones from initial implementation through final delivery.
- Worked with WordPress, Magento, Drupal, osCommerce, PayPal, CodeIgniter and custom-developed websites.

Junior PHP Developer / Freelance Web Developer

Freelancer.com | India | 2005-2009

- Delivered client website projects and completed development work to agreed requirements and timelines.
- Built and maintained websites using PHP, WordPress, Magento, Drupal, osCommerce, PayPal and CodeIgniter.

RECENT TECHNICAL PROJECTS & INDEPENDENT WORK

AI & Python Automation — Python-based automation workflows combining AI services, APIs, validation and document/content generation.

Automated Publishing Systems — Automated production pipelines for generating, validating, formatting and preparing puzzle-book content and print-ready PDFs.

AI-Assisted Software Development — Modern AI coding workflows for PHP/MySQL development, legacy-code improvement, prototyping, debugging, CRUD/CMS work and SQL.

Chess Content Automation — Automated chess-puzzle generation and quality-control workflows, including engine-based solution validation and structured book production.

TECHNICAL CAPABILITY PROFILE

PHP / MySQL — Long-term production experience in backend development, database-backed applications and client systems.

API Integration — Experience integrating business APIs, payment services, mapping services, Salesforce and web-service endpoints.

Web Platforms — WordPress, Magento, Drupal, osCommerce and custom-developed websites.

JavaScript / React — Frontend development, Ajax-based interfaces and ReactJS exposure.

Python — Automation, data/content workflows, document generation and tooling.

AI Workflows — AI-assisted coding, content generation, API orchestration and automated production workflows.

Quality & Delivery — Requirement analysis, implementation planning, debugging, validation, security awareness and delivery management.

TOOLS & TECHNOLOGIES

Languages: PHP, Python, JavaScript, HTML, CSS

Database: MySQL

Frameworks / CMS: CodeIgniter, WordPress, Magento, Drupal, osCommerce

APIs / Services: REST, Salesforce, payment gateways, Google Maps, PayPal

Modern Workflow: AI-assisted coding, automation scripts, API-driven pipelines, PDF/document generation

EDUCATION

Bachelor of Commerce	Annamalai University, Tamil Nadu, India 1991–1993
----------------------	---

Web Developer Course	Velai Institute, Madurai, Tamil Nadu 2003–2005
----------------------	--

PROFESSIONAL HIGHLIGHTS

- 15+ years of professional web-development experience documented in the original resume.
- Experience owning projects from requirements gathering and planning through implementation and final delivery.
- Strong practical background in third-party API integration and database-backed web applications.
- Recent expansion into Python, AI-assisted development and automation-oriented production systems.
- Comfortable working independently on complete client projects and solving practical implementation problems.
